DETAILED ACTION

Claim Objections

1. Claims 6, 8, 10, 11, 13, 16-21, 23, 25-30, 32, 33, 36, 38 and 40 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claims add only nonfunctional descriptive material. See MPEP 2106.IV.B.1(b), first paragraph.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. At claim 1, last two lines (two places), "the industry" lacks antecedent basis.

Claim Rejections - 35 USC § 102 and 35 USC § 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

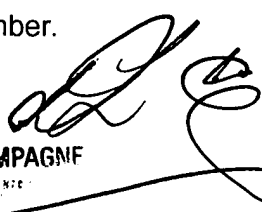

Art Unit: 3622

6. Claims 1-7, 9, 11-14, 21, 22, 24, 31, 35, 38 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by *NYTimes.com* (Pages from the 22 April 1999 online edition of *The New York Times*).
7. NYTimes.com teaches (independent claims 1, 35 and 39) a method and computer system for providing information services, the method comprising: (3) entering data selected for placement onto web pages; and (4) arranging and displaying the data entered in step (3) on at least the following subwebs (p. 2/xx): *Business* (left column, item marked "A"), which reads on "industry overview"; the link to the article 2 *European Telecommunications Giants Merge* (center column, item marked "B"), which reads on "corporations in the industry"; and *Automobiles* (left column, item marked "C"), which reads on "products produced by the industry".
8. NYTimes.com does not explicitly teach further reviewing by an editor. However, under the principles of inherency (MPEP § 2112.02), since the reference invention necessarily performs the method claimed, the method claimed is considered to be anticipated by the reference invention. As evidence tending to show inherency, it is noted that all newspapers are assembled by editors in a process of further reviewing information from reporters, wire services, reference books and other sources.
9. For claim 35, NYTimes.com also teaches the sections Siteguide (*SITE INDEX*, left column, item marked "D"), Hot Sheet (*QUICK NEWS*, left column, item marked "E") and *Business* (left column, item marked "A"), which reads on "Alliances" because it contains analysts proprietary research.
10. NYTimes.com also teaches at the citations given above claims 2-7, 9, 11-14, 21, 22, 24, 31 and 38.
11. Claims 8, 10, 15-20, 23, 25-30, 32-34, 36, 37 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over *NYTimes.com*. NYTimes.com does not teach these limitations. Official notice is taken (MPEP § 2144.03) that these limitations were common the time of the instant invention. It would therefore have been obvious to add these limitations to the teachings of *NYTimes.com*.

Conclusion

12. The references made of record and not relied upon are considered pertinent to applicant's disclosure. Sieffert et al. (US006594662B1) teaches some features of the instant invention.
